

ARUP SINGHA ROY

Application Production Support Analyst · Automation & Reliability Engineering

arupsinghroy@gmail.com | github.com/iarupsingharoy007

SUMMARY

Application Production Support Analyst with 6+ years across banking, advisory, and IT services, specializing in Linux, SQL, and batch-job monitoring for high-impact, production-critical systems. Focused on reducing manual intervention through automation — building shell-scripted health checks, Autosys job-recovery routines, and ETL/reporting pipelines that keep risk-calculation and enterprise platforms stable. Comfortable owning an incident end-to-end: triage, root-cause, automate the fix, and document it so it doesn't recur.

CORE SKILLS

Automation & Scripting: Shell Scripting, Python, Autosys job scheduling & recovery, ETL pipeline automation

Systems & Databases: Linux, SQL, Sybase IQ, Database Management Systems (DBMS)

Monitoring & ITSM: ITRS, ServiceNow, ITSM, Regulatory Reporting, Data Quality Validation

Reporting & BI: Tableau, Microsoft Power BI, IBM Cognos Analytics

EXPERIENCE

Citi Oct 2023 — Present

Apps Support Intmd Analyst · Chennai, India

- Provide production support for high-impact, production-critical applications underpinning risk-calculation platforms in banking, diagnosing and resolving application-level issues under SLA.
- Use data insights from logs and monitoring tools to continually improve application performance and catch recurring issues before they escalate.
- Collaborate with cross-functional engineering teams to maintain supporting infrastructure and improve production stability.
- Apply automation to routine health checks and job monitoring, cutting down manual triage time during incidents.

PwC Apr 2023 — Oct 2023

Associate · Advisory (Global Delivery Centre) · Kolkata, India

- Delivered advisory-line engagements out of the Global Delivery Centre, supporting client workstreams within IT services.

Tata Consultancy Services Jul 2019 — Apr 2023

System Engineer · Kolkata, India

- Monitored and maintained production systems, resolving client-raised tickets within defined SLAs.
- Analyzed call-log trends to identify recurring incidents and get ahead of repeat production issues.
- Researched and implemented automated approaches to replace manual processes, including scripted recovery for failed batch jobs.
- Assisted in building out automation for job-failure recovery and ticket resolution workflows, reducing repetitive manual effort for the support team.

EDUCATION

SRM University — Bachelor of Technology (B.Tech) Jun 2015 — May 2019

CERTIFICATIONS

- Python Data Structures — University of Michigan (Coursera), Feb 2018
- BI Foundations with SQL, ETL and Data Warehousing — IBM (Coursera), Dec 2022
